MONSTER SLIME!

**What you will need**
- PVA glue
- Non-toxic laundry detergent/starch (make sure this contains boric acid!)
- Food dye
- Googly eyes/stars/sequins

**Instructions**
1. Use 250ml for each portion of slime. Colour with food colouring to a bright monster green, or any colour you like!
2. Mix up your dry ingredients - laundry detergent and glitter and add to the glue mix teaspoon by teaspoon until you can knead it like a dough without it sticking to your hands.
3. Add googly eyes to make it extra spooky, or stir in sequins for an added sensory effect.
4. You can store the slime in jars, though it may harden over time a little water can help to loosen it up!

⚠️ Please ask an adult to assist and do not eat (it's not toxic but it won't taste nice!)
